## GIET (POLYTECHNIC), JAGATPUR,CUTTACK.

## LESSON PLAN

| Discipline: <br> Electrical Engg. <br> \& ETC Engg. | Semester: <br> 3rd | Name of the Teaching Faculty: Prachi Swain (Lect. In Mathematics) |
| :---: | :---: | :---: |
| Subject: <br> Engg. Math-III | No of Days/per week class allotted: 4P | Semester From Date: to Date: <br> No. of Weeks: 15 |
| Week | Class Day | Theory Topics |
| 1ST | $1^{\text {st }}$ | 1. COMPLEX NUMBER <br> Arrival of complex number. Introduction of $i$ (iota) and its properties. Representation of complex number. Conjugate of a complex number and its properties. |
|  | $2^{\text {nd }}$ | Modulus, Amplitude of a complex number and its properties. Representation of a Complex Number. |
|  | $3^{\text {rd }}$ | Cube roots of Unity and its properties |
|  | $4^{\text {th }}$ | Square roots of a complex Number |
| 2ND | $1{ }^{\text {st }}$ | De Moivre's Theorem and its application |
|  | $2^{\text {nd }}$ | Solve problems on TBE(Text Book Exercise) |

|  | $3^{\text {rd }}$ | 2. MATRICES <br> Define rank of a matrix with examples. |
| :---: | :---: | :---: |
|  | $4^{\text {th }}$ | Perform elementary row transformations to determine the rank of a matrix. |
| 3RD | $1^{\text {st }}$ | State Rouche's theorem for consistency of a system of linear equations in unknowns. |
|  | $2^{\text {nd }}$ | Solve equations in three unknowns testing consistency. |
|  | $3^{\text {rd }}$ | 3. LINEAR DIFFERENTIAL EQUATIONS <br> Define Homogeneous \& Non-Homogeneous linear Differential Equations with constant coefficients with example. General Solution of LDE in terms of C.F and P.I. Rules for Finding the Complementary Function ( $y_{c}$ ). <br> Case-I( Roots of A.E. are real and distinct ) |
|  | $4^{\text {th }}$ | Case-II( Roots of A.E. are real and repeated) <br> Case-III (Roots of A.E. are imaginary) <br> Case-IV (Combined case of all the above 3 cases) |
| 4TH | $1^{\text {st }}$ | Rules For finding Particular integral ( $y_{p}$ ) or Complete Solution ( $y_{c}+y_{p}$ ). $F(D) y=f(x) \Rightarrow y_{p}=\frac{f(x)}{F(D)}$ <br> Case-I ( $f(x)=x^{n}$ form) <br> Case-II $\left(f(x)=e^{a x}\right.$, such that $F(a) \neq 0$.) <br> Case-III $\left(f(x)=e^{a x}\right.$, such that $\left.F(a)=0\right)$ |
|  | $2^{\text {nd }}$ | Case-IV $\left(f(x)=\sin (a x+b)\right.$ or $\cos (a x+b)$ such that $\left.F\left(-a^{2}\right) \neq 0\right)$ Case-V $\left(f(x)=\sin (a x+b)\right.$ or $\cos (a x+b)$ such that $\left.F\left(-a^{2}\right)=0\right)$ |
|  | $3^{\text {rd }}$ | $\begin{aligned} & \text { Case-VI }\left(f(x)=e^{a x} V, V \text { is function of } \mathrm{x}\right) \\ & \text { Case-VII }(f(x)=x V) \end{aligned}$ |

|  | $4^{\text {th }}$ | Solve problems on TBE(Text Book Exercise) |
| :---: | :---: | :---: |
| 5TH | $1^{\text {st }}$ | Partial Differential Equation (PDE): Order and degree of PDE. Formation of a PDE |
|  | $2^{\text {nd }}$ | Formation of PDE |
|  | $3^{\text {rd }}$ | Solve Linear Equation of first order: $P p+Q q=R$ |
|  | $4^{\text {th }}$ | Solve problems on TBE(Text Book Exercise) |
| 6TH | $1^{\text {st }}$ | 4. LAPLACE TRANSFORMS <br> Definition: Gamma Function, Properties of Gamma Function with examples |
|  | $2^{\text {nd }}$ | Definition of Laplace Transform of $f(t)$. Linear Property. <br> Evaluation of Laplace Transformation of some standard/Elementary Functions ( $f(t)=k$ or $t^{n}$ or $e^{a t}$ or $e^{-a t}$ or sinh at or cosh at or sin at or cosat ) |
|  | $3^{\text {rd }}$ | Simple Use Laplace transform of Standard formula. |
|  | $4^{\text {th }}$ | Shifting Theorems/ Property Change of Scale Property |
| 7TH | $1^{\text {st }}$ | Application of Using Shifting Property |
|  | $2^{\text {nd }}$ | Transform of $e^{a t} f(t), t^{n} f(t),{ }_{t}^{1} f(t)$ with Example |
|  | $3^{\text {rd }}$ | Formulate Laplace transform of Derivatives, integrals, multiplication by $t^{n}$ and division by $t$ with example |
|  | $4^{\text {th }}$ | -DO- |
| 8TH | $1^{\text {st }}$ | Define: Inverse Laplace Transform (ILT). Formula for standard function |
|  | $2^{\text {nd }}$ | ILT by method of partial fraction |
|  | $3^{\text {rd }}$ | -Do- |
|  | $4^{\text {th }}$ | Solve problems on TBE(Text Book Exercise) |

| 9TH | $1^{\text {st }}$ | 5. FOURIER SERIES <br> Define Periodic Functions with graphs. Even/Odd Functions. Dirichlet Function |
| :---: | :---: | :---: |
|  | $2^{\text {nd }}$ | Define Fourier Series and its notations. Euler formula for Fourier Series |
|  | $3^{\text {rd }}$ | Workout Examples |
|  | $4^{\text {th }}$ | Dirichlet Condition for the expansion of Fourier series and its convergent |
| 10TH | $1^{\text {st }}$ | Problem Solving on previous class |
|  | $2^{\text {nd }}$ | Problem Solving on previous class |
|  | $3^{\text {rd }}$ | Problem Solving on previous class |
|  | $4^{\text {th }}$ | Fourier Series of Even/Odd functions in ( $0 \leq x \leq 2 \pi$ and $-\pi \leq x \leq \pi$ ) |
| 11TH | $1^{\text {st }}$ | Problem Practice of previous class |
|  | $2^{\text {nd }}$ | Fourier Series of Continuous functions and functions having point of discontinuous in $(0 \leq x \leq 2 \pi$ and $-\pi \leq x \leq \pi)$ |
|  | $3^{\text {rd }}$ | Problem Practice of previous class |
|  | $4^{\text {th }}$ | Solve problems on TBE(Text Book Exercise) and previous year questions |
| 12TH | $1^{\text {st }}$ | 6. NUMERICAL METHODS <br> Limitation of analytical methods of solution of Algebraic Equation. |
|  | $2^{\text {nd }}$ | Derive iterative formula for finding the solutions of Algebraic Equation by I- Bisection Method |
|  | $3^{\text {rd }}$ | II- Newton-Raphson Method |
|  | $4^{\text {th }}$ | Solve problems on TBE(Text Book Exercise) |
| 13TH | $1^{\text {st }}$ | 7. FINITE DIFFERENCE \& INTERPOLATION <br> Formation of Forward $(\Delta)$ and Backward $(\nabla)$ Difference table. |

|  | $2^{\text {nd }}$ | Define: Shift operator $(E)$. Relation among the operators |
| :--- | :--- | :--- |
|  | $3^{\text {rd }}$ | Newton's forward and backward interpolation for equal interval |
|  | $4^{\text {th }}$ | Problem Solving on previous class |
|  | $1^{\text {st }}$ | Problem Solving on previous class |
|  | $2^{\text {nd }}$ | Lagrange Interpolation formula for unequal intervals |
|  | $3^{\text {rd }}$ | Problem Solving on previous class |
|  | $4^{\text {th }}$ | Explain Numerical Integration. 1. Newton's Cote's formula |
|  | $1^{\text {st }}$ | Problem Solving on previous class |
|  | $2^{\text {nd }}$ | 2. Trapezoidal Rule. Solving problems |
|  | $3^{\text {rd }}$ | 3. Simpson's 1/3 rd rule. Solving Problems. |
|  | $4^{\text {th }}$ | Problem Solving on previous class |
